

Hoe Valley Carpark

Leisure Centre Revamp

We have recently completed an exciting new project in conjunction with Volker Fitzpatrick on behalf of Woking Borough Council in a £3.5m upgrade of local leisure facilities.

The new state of the art car park at Woking Leisure Centre has been constructed to house not only cars and increase the parking facilities at the centre, but also to have 4 new all weather football pitches on top.

GA Electrical installed all energy efficient lighting throughout the car park which saves on power and cost by dimming up and down when people move around the building.

Final completion of the project saw GA installing high spec external flood lights to the football pitch, CCTV, door entry, fire alarm and lightning protection systems throughout the building to ensure this was a safe place to play football in all conditions.

Its been great to see the finished project, especially as it'll benefit so many in the community. We'll look forward to seeing the players out there on the pitches come rain or shine!
